Good morning, Susan!

I received a copy of the draft SPR language from Kelly. I inserted it into the version of the fL rule that went to PPM for review. Can you take a look and make sure it makes sense to you? There is one highlighted sentence that is meant to serve as a reminder to make sure we addressed it earlier within the preambular language. That sentence is *Make sure that you have described in the species background and threats discussion how any loss of historical range has affected the species throughout its range.*

L et me know if you have any questions.

Thanks,
Caitlin
